

U.K.A.T. Rules

THROWING LINES

Each throwing line must be equipped with 3 targets placed and fixed in a safe, stable manner and according to the provisions provided by the regulations. Each throwing lane must have clear and visible ground lines, perfectly parallel to the targets and arranged at distances of 3 4 5 6 7 meters. Each throwing lane must have an adequate width to allow the thrower to position himself comfortably in front of each target. Throwing lanes should be spaced as far apart as possible. If the distance between them is less than 6 meters, throwers will have to wait until the occupant of the adjacent lane has finished their series of throws before approaching the targets and retrieving the tools. With a distance between lanes of at least 6 meters, throwers will be able to proceed with the recovery of their equipment without waiting. The throwing lanes must be measured and approved by the competition judge before the start of the competition.

TARGETS

Targets must be mounted in batteries of 3 for each throwing lane and comply with the following characteristics and dimensions:

They must be made of wood, which can be in slices of logs (recommended and preferable), assembled of wooden cubes made from beams (so-called “end grain target”), wall of planks (not recommended but acceptable if other solutions were not available). For layout and measurements, please refer to the images.

The targets must be divided into 5 circular concentric sectors that correspond to the relative scores and must be placed at the respective heights of 150-130-150 cm, measuring from the ground to the exact target center.

In case of impossibility to find targets with a diameter of 50 cm, targets with a diameter of 40 cm are accepted.

Targets with a diameter of 50 cm will have the following colors and scores: Red ring outside 1 point – White ring outside 2 points – Red ring inside 3 points – White ring inside 4 points – Black center (bulls eye) 5 points

Targets with a diameter of 40 cm will have the following colors and scores: Red ring outside 2 points – White ring 3 points – Red ring inside 4 points – Black center (bulls eye) 5 points

Whoever hosts the competition can choose which and how many games they want to have so long as the rules are published for all to see well before the Competition.
